

**History Foundation** is a non-governmental organisation founded in September 1991, by the joint initiative of a group of intellectuals of various backgrounds and professions, most of them being historians and social scientists. It is working in the public interest with the objective of developing and extending history-consciousness in Turkey. It aims at enriching and lending a new content to the way in which people regard history and at encouraging the conservation of the historical heritage with a deep-rooted sensitivity and active participation of wide sections of the population. It carries out its functions by means of all types of research and educational work, and by engaging in, organising or assisting in various types of activity such as publication of books and periodicals, production of documentary films and radio and television programs, electronic publishing, production of artistic and literary works in the field of history, musicological and exhibition activities, scholarly meetings, library and archival services, cultural tourism, etc. The History Foundation's publications and events highlight moments and histories of violence that are not acknowledged by official historical accounts in Turkey.
