

European Human Rights Advocacy Center (EHRAC) is an independent apolitical organisation that stands alongside victims of human rights abuse in order to secure justice. Working in support of civil society organisations, EHRAC brings strategic cases to the European Court to challenge impunity for human rights violations. The organisation raises awareness of violations and means of redress for victims, and builds capacity of individuals and organisations through mentoring, training and advocacy. EHRAC believes that each judgment contributes to an objective account of human rights abuse that cannot be refuted.
